

The map illustrates the Spanish Circum-Caribbean current in the Atlantic Ocean. The current is represented by a thick orange line with arrows indicating its direction. It starts in the Gulf of Mexico, flows north along the coast of North America, and then turns westward along the coast of Africa. Red dots mark the start and end points of the current. The map also shows the outlines of Mainland North America, Brazil, Europe, and Africa. A zoom control is visible in the top left corner.
